ACKNOWLEDGEMENT

Praise to "Allah", the most gracious and the merciful who guides us to the right way. First, I would like to thank "Allah" who helped me during my work and only by his will, this work was accomplished.

I wish to express my deep gratitude and appreciation to Prof. Dr. Beshir Ahmed Abd-EL- Nabey, Professor of Physical Chemistry, Chemistry Department, Faculty of Science, Alexandria University, for his guidance and constructive criticism during the various stages of this work and finalizing the thesis in its present form.

I wish also to acknowledge my sincere appreciation to Prof. Dr. Essam Khamis Ibrahim, Professor of Physical Chemistry, Faculty of Science, Alexandria University and Director of the City of Scientific Researches and Technological applications, Borg El-Arab, for suggesting and supervising this work and for his guidance, encouragement, help and valuable discussion.

A great appreciation goes to Prof. Dr. Ashraf Moustafa Abd-El-Gaber, Assistant Professor of Physical Chemistry, Chemistry Department, Faculty of Science, Alexandria University, suggesting and supervising this work and for his guidance, patience, constant motivation, support throughout the duration of the work and valuable discussion, I am infinitely grateful.

To my mother, father and sisters

Whose patience, effort and spiritual help I'll never be able to repay. The kindness and love with which they've endured the most difficult of moments would never be forgotten and Thanks most of all for prayers that I am sure led me through to the end.

Last but not least, I would like to thank

The soul of grand father and grand mother, siblings, family and

Friends

Goes my most thankful regards for the love and Support by which the helped me.
