

**NEW TECHNIQUE FOR PRODUCTION OF BIODIESEL
FROM WASTE COOKING OIL**

A Thesis

**Submitted to the Graduate School,
Faculty of Engineering, Alexandria University**

**In Partial Fulfillment of the
Requirements for the degree**

**Of
Master of Science
In
Chemical Engineering**

**Submitted by
Eng. Amira Kamal El Gendy**

2015

ACKNOWLEDGEMENTS

First and foremost, I would like to express my sincere gratitude to my supervisors, for all their help, continued encouragement and invaluable guidance throughout this thesis.

Prof. Dr. Hassan Farag. & Prof. Dr. Ahmed Zatoot

My most special thanks go to

Dr. Marwa Abdelfattah

My thesis advisor and mentor, who has been tactfully guiding and motivating me along the way, In spite of her tight schedule, she always found the time to discuss anything from intriguing experimental results to the issue of survival in the scientific world, thank you for your hard work, incredible patience and enthusiasm.

I am very thankful to *My Parents*, for their unconditional love and encouraging me to continue my journey of learning. They have taught me that no matter how hard life has become, determination and hard work will steer me towards my destination.

I am forever indebted to *My Husband*, for his patience, unlimited understanding and true love. He has helped me every possible way to make my life

easier and been there for me not only as my life partner but also as my guiding spirit.

Finally, I am thankful to my colleagues for their help, guidance and moral support.

Above all, I would like to thank God Almighty, for giving me the guidance, strength, courage and perseverance throughout my academic and personal life.

“This thesis would not have been possible if it were not for many people.”
