

**"Optimization of the parameters of
Antireflection coating by pulsed laser
deposition"**

THESIS

Submitted for fulfillment of the

M.Sc. Degree

In

Laser Sciences and Interactions

Laser Interaction with Matter

By

Shorouk Mohamed Nabil Ibrahim Assam

Cairo University

2018

Acknowledgement

First of all, I would like to thank **Allah** for helping me to be on the right track and showed me the way to proceed. I could never have come this far without his help.

I wish to express my appreciation to my supervisor **Prof. Dr. Yehia Badr**, professor of laser spectroscopy Department of Laser Sciences and Interactions at National Institute of Laser Enhanced Sciences, Cairo University for his patient guidance, enthusiastic encouragement and useful critiques of this research work.

I would also like to thank **Assist. Prof. Dr. Nabil El-nashar**, associate Professor of optics at Faculty of Allied Medical Science, Pharos University in Alexandria for his advice, encouragement, supporting and assistance to me along the way. My grateful thanks are also extended to **Dr. Ayman Abou El-maged**, lecturer at National Institute of Laser Enhanced Sciences, Cairo University.

I would also like to thank **Dr. Hany Hashem**, lecture at Physics of department faculty of science, Helwan University, for assistance to me for preparation MgF_2 single layer by thermal evaporation and electron beam.

I would like to thank **my parents** for their love and support throughout my life. I also wish to thank my brother and my sisters for being in my life. I couldn't have done this without them.
