Department of Chemical Engineering

## **Intensification of the rate of mass transfer and analogy with heat transfer**

**A Thesis submitted in partial fulfillment of the requirements  
for the Degree of Doctor of Philosophy**

**In**

**Chemical Engineering**

**Presented by**

**Eng.Fathy Ahmed Shokry Ahmed Fathy**

**M.Sc. (Chemical Engineering),  
Faculty of Engineering, Alexandria University, 2014**

**2020**

## **Acknowledgment**

Thanks to ALLAH, I could finish this thesis only by his guidance and will.

I would like to express my deep gratitude and appreciation to professor:

### **Prof.Dr.Gomaa H. Sedahmed**

For his close and keen supervision, creative comments, advices, sincere unlimited helpful assistance and continuous guidance along with his constructive suggestions, giving me too much of his busy time and efforts in performing this work.

I would like to express my sincere gratitude to my advisor.

### **Prof.Dr.Hassan A.Farrag**

For the continuous support throughout the thesis and for his patience, motivation, enthusiasm, and immense knowledge.

I wish to express my deepest gratitude to

### **Associ.Prof.Dr. Marwa Abdelfattah**

for her support and encouragement during this thesis. At many stages in this thesis, I benefited from her advice, particularly so when exploring new ideas. Her positive outlook and confidence in my research inspired me and gave me confidence. Her careful editing contributed enormously to complete the experimental part perfect And also, the production of this thesis.

I would like to thank my thesis advisor

### **Associ.Prof.Dr. Dina A.Elgayar**

She is always accommodating and have a helping hand if I had question about my research or writing. She shows support in everything I do and teaches me the right direction for my thesis writing.

And I would like to thank

### **Pharos University in Alexandria**

for helping me throughout this thesis and providing me with a suitable environment and giving me the needed support to finish this thesis especially Administration of Faculty of Engineering and Petrochemicals Engineering department

I express my gratitude to

**My father**

**My mother**

**My future wife**

During my years of study and the process of researching and writing this thesis they provided me with unfailing support and constant encouragement. Without them, the accomplishment would have been unlikely.

I also wish to thank the experts who took part in the validation survey for this thesis project under the supervision of

**Dr Mosaad Elkasaby**

**SIDPEC Company**

**Eng.Khaled El sayed**

**Alex.Fert.Company**

As the validation survey could not have been successfully performed without their enthusiastic involvement and feedback.

I would also like to thank

**Prof.Dr. Yohannes Kiros**

Who is so helpful and has kindly dedicated his time and experience to the success of this research and also provided me with the requisite information to make this work more realistic.

I would also like to acknowledge

**Dow Chemical Company**

as they have supplied me with the needed polymer to finish this work, and I am gratefully indebted to their very valuable efforts.

Finally, I would like to thank everyone that one way or another had a contribution in this project. I can only say

"Thank you very much to all of you".
