**MODELING AND SIMULATION OF CO₂ REMOVAL FROM
NATURAL GAS BY MEMBRANE**

*A thesis submitted in partial fulfillment of the requirement for the degree of
Master of Science*

In
Petrochemical Engineering

Submitted by

Ahmed Wahba El Sayed Gabr

B. Sc. in Natural Gas, Faculty of Engineering, Port-Said University, 2010

2024

ACKNOWLEDGMENT

To be honest I would give my heartfelt gratitude to my wife for her unwavering support and motivation throughout my academic pursuit, which has been a critical source of encouragement in navigating the rigorous and demanding academic journey. I would like to express my parents' constant love and support have also been essential in shaping my academic and personal growth, providing invaluable guidance and support in developing my sense of purpose, determination, and perseverance. I am deeply grateful to Assoc. Prof. Dr. Noha Said Youssef and Prof. Dr. Ahmed El-Shazly for their exceptional guidance and mentorship in fostering my academic and professional success. Lastly, I would like to acknowledge Pharos University in Alexandria for providing me with the platform to pursue my academic goals and aspirations.
