

BUILDING AN INNOVATION MEANING

PHAROS CENTER

FOR AI

APPLICATIONS

1

Education and Training

- Provide educational programs and workshops to train professionals in AI technologies.
- Develop certification programs to enhance skills in AI and machine learning.

2

Research and Development

- Foster innovative AI research to advance the state of the art in various domains.
- Develop proprietary algorithms and models tailored to specific industry needs.

3

Industry Applications

- Identify and develop AI solutions for specific sectors like healthcare, finance, manufacturing, and transportation.
- Create case studies demonstrating successful AI implementations.

4

Public Engagement and Awareness

- Conduct outreach programs to raise awareness about AI benefits and challenges.
- Organize public lectures, seminars, and conferences on AI-related topics.
